Supporting Users in Password Authentication with

Persuasive Design Tobias Seitz 2018-08-03 Activities like text-editing, watching movies, or managing personal finances are all accomplished with web-based solutions nowadays. The providers need to ensure security and privacy of user data. To that end, passwords are still the most common authentication method on the web. They are inexpensive and easy to implement. Users are largely accustomed to this kind of authentication but passwords represent a considerable nuisance, because they are tedious to create, remember, and maintain. In many cases, usability issues turn into security problems, because users try to work around the challenges and create easily predictable credentials. Often, they reuse their passwords for many purposes, which aggravates the risk of identity theft. There have been numerous attempts to remove the root of the problem and replace passwords, e.g., through biometrics. However, no other authentication strategy can fully replace them, so

passwords will probably stay a go-to authentication method for the foreseeable future. Researchers and practitioners have thus aimed to improve users' situation in various ways. There are two main lines of research on helping users create both usable and secure passwords. On the one hand, password policies have a notable impact on password practices, because they enforce certain characteristics. However, enforcement reduces users' autonomy and often causes frustration if the requirements are poorly communicated or overly complex. On the other hand, user-centered designs have been proposed: Assistance and persuasion are typically more user-friendly but their influence is often limited. In this thesis, we explore potential reasons for the inefficacy of certain persuasion strategies. From the gained knowledge, we derive novel persuasive design elements to support users in password authentication. The exploration of contextual factors in password practices is based on four projects that reveal both psychological aspects and real-world constraints. Here,

we investigate how mental models of password strength and password managers can provide important pointers towards the design of persuasive interventions. Moreover, the associations between personality traits and password practices are evaluated in three user studies. A meticulous audit of real-world password policies shows the constraints for selection and reuse practices. Based on the review of context factors, we then extend the design space of persuasive password support with three projects. We first depict the explicit and implicit user needs in password support. Second, we craft and evaluate a choice architecture that illustrates how a phenomenon from marketing psychology can provide new insights into the design of nudging strategies. Third, we tried to empower users to create memorable passwords with emojis. The results show the challenges and potentials of emoji-passwords on different platforms. Finally, the thesis presents a framework for the persuasive design of password support. It aims to structure the required activities during the entire process. This enables researchers and practitioners to craft novel systems that go beyond traditional paradigms, which is illustrated by a design exercise.

Small-Scale Aquaponic Food Production Food and Agriculture Organization of the United Nations 2015-12-30 Aquaponics is the integration of aquaculture and soilless culture in a closed production system. This manual details aquaponics for small-scale production--predominantly for home use. It is divided into nine chapters and seven annexes, with each chapter dedicated to an individual module of aquaponics. The target audience for this manual is agriculture extension agents, regional fisheries officers, non-governmental

organizations, community organizers, government ministers, companies and singles worldwide. The intention is to bring a general understanding of aquaponics to people who previously may have only known about one aspect.

Innovations in Economic Education Mary Beth Henning 2016-11-25 Innovations in Economic Education addresses the growing issue of financial illiteracy by showing how economics can be successfully integrated into classrooms

from kindergarten through higher education. Pre-service teachers, experienced educators, curriculum leaders, parents, and school administrators will find practical ideas to improve economic understanding. At the elementary level, the book provides creative ways of introducing young students to the basic concepts of economics, financial justice, and social action. For higher grade levels, the book offers ideas to integrate economics into current history, civics, and math curricula. The final portion of the book features recommendations by leading economic educators on how economics can play a greater role in teachers' professional development. The pedagogical tools presented in each chapter include lesson plans and practical insights, and are designed to meet the NCSS, C3 Framework, and Common Core State Standards for Social Studies. This book is a timely and valuable resource for all educators interested in improving their students' economic literacy and financial decision-making.

Data Mining: Concepts and Techniques Jiawei Han
2011-06-09 Data Mining: Concepts and Techniques provides the concepts and techniques in processing gathered data or information, which will be used in various applications. Specifically, it explains data mining and the tools used in discovering knowledge from the collected data. This book is referred as the knowledge discovery from data (KDD). It focuses on the feasibility, usefulness, effectiveness, and scalability of techniques of large data sets. After describing data mining, this edition explains the methods of knowing, preprocessing, processing, and warehousing data. It then presents information about data warehouses, online analytical processing (OLAP), and data cube technology. Then, the methods involved in mining frequent patterns, associations, and correlations for large data sets are described. The book details the methods for data classification and introduces the concepts and methods for data clustering. The remaining chapters discuss the outlier detection and the trends, applications, and research frontiers in data mining. This book is intended for Computer Science students, application developers, business professionals, and researchers who seek information on data mining. Presents dozens of algorithms and implementation examples, all in pseudo-code and suitable for use in real-world, large-scale data mining projects Addresses advanced topics such as mining object-relational databases, spatial databases, multimedia databases, time-series databases, text

databases, the World Wide Web, and applications in several fields Provides a comprehensive, practical look at the concepts and techniques you need to get the most out of your data

Hearts Touched with Fire David Gergen 2022-05-10 INSTANT NEW YORK TIMES BESTSELLER A powerful guide to the art of leadership from David Gergen—former White House adviser to four US presidents, CNN analyst, and founder of the Harvard Center for Public Leadership. As nations careen from one crisis to the next, there is a growing cry for fresh leadership. Those in charge have repeatedly fallen short, and trust in institutions has plummeted. So, what does great leadership look like? And how are great leaders made? David Gergen, a leader in the public arena for more than half a century, draws from his experiences as a White House adviser to four presidents, his decades as a trusted voice on national issues, and years of teaching and mentoring young people to offer a stirring playbook for the next generation of change-makers. To uncover the fundamental elements of effective leadership, Gergen traces the journeys of iconic leaders past and present, from pathbreakers like Ruth Bader Ginsburg, John Lewis, John McCain, and Harvey Milk to historic icons like Lincoln, John F. Kennedy, Winston Churchill, and Eleanor and Franklin Roosevelt, to contemporary game changers like Greta Thunberg, the Parkland students, and the Black Lives Matter movement. Leadership is a journey that starts from within, Gergen writes. A leader must become self-aware and then achieve self-mastery. You cannot lead others until you can lead yourself. As you start to leap into the world, you begin your outer journey, overcoming setbacks, persuading others, empowering them, and navigating crises—armed with a sense of history, humor, passion, and purpose. By linking lessons of the past with the ever-changing

practice of leadership today, Gergen reveals the time-tested secrets of dynamic leadership. An indispensable manual, Hearts Touched with Fire distills experience and wisdom of the past into an invaluable guide for leaders of our future.

The Christian Writer's Manual of Style Zondervan, 2010-05-11 An essential tool for writers, editors, proofreaders, designers, copywriters, production managers, and marketers too. The Christian Writer's Manual of Style is an essential tool not only for writers of religious materials, but for their editors, proofreaders, designers, copywriters, production managers, and even marketers. Rather than simply repeating style information commonly available in standard references, this newly updated and expanded edition includes points of grammar, punctuation, usage, book production and design, and written style that are often overlooked in other manuals. It focuses on information relating to the unique needs and demands of religious publications, such as discussions on how to correctly quote the Bible, how to capitalize and use common religious terms, and how to abbreviate the books of the Bible and other religious words. Also included are rarely found items such as:• an author's guide to obtaining permissions• guidelines for using American, British, and Mid-Atlantic styles• discussions of inclusive language, profanity, and ethnic sensitivities• discussions of Internet and computer-related language style• a list of problem words• style issues regarding words from major world religions• a discussion of handling brand names in text• a list of common interjections• issues of type design, paper, copy-fitThis edition has been completely updated since the 1988 edition and contains more than twice as much

information as the previous edition. This is the most detailed and comprehensive guide of its kind.

Smart and Green Solutions for Civil Infrastructures Incorporating Geological and Geotechnical Aspects Hadi Khabbaz 2021-07-10 Advancement in design and construction to embrace the impact of rapid global urbanization growth in infrastructure development is inevitable. This proceedings volume includes many smart and green solutions for civil infrastructures, incorporating geotechnical and engineering geology aspects. The articles presented in this volume are attempts made by the researchers and practitioners to address many geotechnical challenges, based on the state-of-the-art practices, innovative technologies, new research results and case histories in construction and design towards safer and cost effective infrastructures. This volume covers a wide range of topics with direct relevance to people within the broad field of geomechanics, including consultants, contractors,

academics, materials suppliers and the owners and operators of civil infrastructures. Many papers associated with numerical modeling of transport infrastructure, advanced soil and rock testing, field monitoring, tunnelling, expansive soils, geo-center motion, triaxial and dynamic testing, piles etc. are included. The content is based on the contributions to the 6th GeoChina International Conference on Civil & Transportation Infrastructures: From Engineering to Smart & Green Life Cycle Solutions -- Nanchang, China, 2021.
