*COVER* Melinda Moeur 1985 The COVER extension to the Stand Prognosis Model predicts tree canopy closure, crown volume, crown profile area, and foliage biomass within vertical height classes, and the

probability of occurrence, height, and cover of shrubs in forest stands. The model may be used to produce a descriptive summary of a stand at the time of inventory, or to project overstory and understory characteristics through time for natural and managed stands. This paper documents use of the COVER program, an adjunct to Version 5.0 of the Prognosis Model. Preparation of input, interpretation of output, program control, and model characteristics are described. Potential applications of COVER estimates to wildlife, hydrology, and insect pest modeling are presented.

**The Routledge Course on Media, Legal and Technical Translation** Mahmoud Altarabin 2020-10-26 The Routledge Course on Media, Legal and Technical Translation: English-Arabic-English is an indispensable and engaging coursebook for university students wishing to develop their English-Arabic-English translation skills in these three text types. Taking a practical approach, the book introduces Arab translation students to common translation strategies in addition to the linguistic, syntactic, and stylistic features of media, legal, and technical texts. This book features texts carefully selected for their technical relevance. The key features

include: • comprehensive four chapters covering media, legal, and technical texts, which are of immense importance to Arab translation students; • detailed and clear explanations of the lexical, syntactic, and stylistic features of English and Arabic media, legal, and technical texts; • up-to-date and practical translation examples in both directions offering students actual experiences of professional translators; • authentic texts extracted from various sources to promote students' familiarity with language features and use; • extensive range of exercises following each section of the book to enable students to test and practice the knowledge and skills they developed from reading previous sections; • glossaries following most exercises containing the translation of difficult words; and • a list of recommended readings following each chapter. The easy, practical, and comprehensive approach adopted in the book makes it a must-have coursebook for intermediate and advanced students studying translation between English and Arabic. University instructors and professional translators working on translation between English and Arabic will find this book particularly useful.

**Handbook of Item Response Theory, Volume Two** Wim J. van der Linden 2016-02-22 Drawing on the work of internationally acclaimed experts in the field, *Handbook of Item Response Theory, Volume Two: Statistical Tools* presents classical and modern statistical tools used in item response theory (IRT). While IRT heavily

depends on the use of statistical tools for handling its models and applications, systematic introductions and reviews that emphasize their relevance to IRT are hardly found in the statistical literature. This second volume in a three-volume set fills this void. Volume Two covers common probability distributions, the issue of models with both intentional and nuisance parameters, the use of information criteria, methods for dealing with missing data, and model identification issues. It also addresses recent developments in parameter estimation and model fit and comparison, such as Bayesian approaches, specifically Markov chain Monte Carlo (MCMC) methods.
