**The COVID-19 Crisis** Deborah Lupton 2021-04-20 Since its emergence in early 2020, the COVID-19 crisis has affected every part of the world. Well beyond its health effects, the pandemic has wrought major changes in people's everyday lives as they confront restrictions imposed by physical distancing and consequences such as loss of work, working or learning from home and reduced contact with family and friends. This edited collection covers a diverse range of experiences, practices and representations across international contexts and cultures (UK, Europe, North America, South Africa, Australia and New Zealand). Together, these contributions offer a rich account of COVID society. They provide snapshots of what life was like for people in a variety of situations and locations living through the first months of the novel coronavirus crisis, including discussion not only of health-related experiences but also the impact on family, work, social life and leisure activities. The socio-material dimensions of quotidian practices are highlighted: death rituals, dating apps, online musical performances, fitness and exercise practices, the role of windows, healthcare work, parenting children learning at home, moving in public space as a blind person and many more diverse topics are explored. In doing so, the authors surface the feelings of strangeness and challenges to norms of practice that were part of many people's experiences, highlighting the profound affective responses that accompanied the disruption to usual cultural forms of sociality and ritual in the wake of the COVID outbreak and restrictions on movement. The authors show how social relationships and social institutions were suspended, re-

invented or transformed while social differences were brought to the fore. At the macro level, the book includes localised and comparative analyses of political, health system and policy responses to the pandemic, and highlights the differences in representations and experiences of very different social groups, including people with disabilities, LGBTQI people, Dutch Muslim parents, healthcare workers in France and Australia, young adults living in northern Italy, performing artists and their audiences, exercisers in Australia and New Zealand, the Latin cultures of Spain and Italy, Asian-Americans and older people in Australia. This volume will appeal to undergraduates and postgraduates in sociology, cultural and media studies, medical humanities, anthropology, political science and cultural geography.

**Nursing and Informatics for the 21st Century, 3rd Edition - Book 2** Taylor & Francis Group 2022-04-21 Nursing and Informatics for the 21st Century Series is a critical resource in chronicling the huge historical shift in nursing linked to the explosion of EHR national and international strategies and health policies around the globe. Each book in the series examines the revolution that has occurred in nursing and explores the role IT continues to play in this transformation, with a thoughtful examination of nursing practice, science and research, and education. This book, Nursing Education and Digital Health Strategies explores the current state of health and healthcare education, as well as the current state of nursing informatics education. These topics include technologies-enabled education for all nurses and interprofessional collaborations from a worldwide perspective. The "New" learning for applied critical thinking will include technology, content, skills versus tools, and the use of "smart" systems for care delivery, the role of critical thinking and uniqueness of nursing care delivery. Further, how these changes are understood as a paradigm shift that needs to be incorporated along with nursing and healthcare education is emphasized. The effects of technology on human behavior are also explored, addressing human-factors interaction, interdependence of human computer interaction and other effects of technology on wellbeing. As part of nursing education, learning from clients/patients to better shape and advance nursing education and scholarship are discussed. Academic-clinical practice partnerships for a digital future, how teams are working together (clinician/teacher) for better healthcare delivery and applied knowledge, including joint appointments (exchange of academia and applied expertise), academic-applied human resources, and interprofessional learning/development are discussed. The book closes by discussing and using case studies to showcase nursing competencies for the next decade, and implications for preparing the healthcare workforce for a digital world, faculty readiness and the interaction with gaming and simulations. Nursing informatics education, including continuing education beyond academia, i.e., informal education, worldwide is described as well as global challenges to support digital world capabilities. Hands-on Experiential Delivery (shifting from lecture-based delivery) - case studies learning-based exemplars are included.

[Mechatronic Futures](#) Peter Hehenberger 2016-06-10 Offering a comprehensive overview of the challenges, risks and options facing the future of mechatronics, this book provides insights into how these issues are currently assessed and managed. Building on the previously published book 'Mechatronics in Action,' it identifies and discusses the key issues likely to impact on future mechatronic systems. It supports mechatronics practitioners in identifying key areas in design, modeling and technology and places these in the wider context of concepts such as cyber-physical systems and the Internet of Things. For educators it considers the potential effects of developments in these areas on mechatronic course design, and ways of integrating these. Written by experts in the field, it explores topics including systems integration, design, modeling, privacy, ethics and future application domains. Highlighting novel innovation directions, it is intended for academics, engineers and students working in the field of mechatronics, particularly those developing new concepts, methods and ideas.
