The Real Toy Story Eric Clark 2007-01-09 The American toy business is massive, world dominating, cutthroat, exciting, and increasingly willing to sacrifice our kids in its frantic rush for profit. And yet, for all its rapaciousness, the industry is in the business of delighting and fascinating our children. Toys are one of the most emotive subjects in the world. We all remember our own toys; we care desperately about those we choose for our kids, knowing these objects help shape children's lives. They are also a constantly newsworthy item: every Christmas, which toys are hot -- and the scramble by parents to grab them before the stores are empty -- is front-page and TV bulletin news. The Real Toy Story tells the tales of these toys and of the vast, world-dominating \$22 billion American industry that creates them. The rewards for success are enormous: a top toy can earn billions -- H. Ty Warner shot into Forbes's World's Richest People list with his creation of Beanie Babies. The price of failure is just as huge -- the battlefield is littered with the corpses of once-successful toy companies whose multimillion-dollar gambles did not pay off. It is a world of contrasts. The Real Toy Story looks at both sides: at Slinky, Elmo, Barbie, Transformers, and their creators, but also at the dark side of an industry that leads the way in cold-blooded marketing targeted at children. Parents will want to learn about how this seemingly benign industry exploits, sometimes surreptitiously, the many new media: cable television, the internet, CD-ROMs, sometimes even invading the playgrounds to peddle their wares to unsuspecting young people. Perhaps more disturbingly, this hard-hitting book examines the vast gap between the cuddly image of toys and how almost all toys destined for America are actually produced in China under sweatshop conditions. Today the toy industry is in the midst of rapid change. Tapping into the concern millions of adults have about the toys they choose for the children in their lives, this riveting exposé is essential reading for everyone who cares about kids.

Reclaiming Fair Use Patricia Aufderheide 2011-07-15 In the increasingly complex and combative arena of copyright in the digital age, record companies sue college students over peer-to-peer music sharing, YouTube removes home movies because of a song playing in the background, and filmmakers are denied a distribution deal when some permissions "i" proves undottable. Patricia Aufderheide and Peter Jaszi chart a clear path through the confusion by urging a robust embrace of a

principle long-embedded in copyright law, but too often poorly understood—fair use. By challenging the widely held notion that current copyright law has become unworkable and obsolete in the era of digital technologies, Reclaiming Fair Use promises to reshape the debate in both scholarly circles and the creative community. This indispensable guide distills the authors' years of experience advising documentary filmmakers, English teachers, performing arts scholars, and other creative professionals into no-nonsense advice and practical examples for content producers. Reclaiming Fair Use begins by surveying the landscape of contemporary copyright law—and the dampening effect it can have on creativity—before laying out how the fair-use principle can be employed to avoid copyright violation. Finally, Aufderheide and Jaszi summarize their work with artists and professional groups to develop best practice documents for fair use and discuss fair use in an international context. Appendixes address common myths about fair use and provide a template for creating the reader's own best practices. Reclaiming Fair Use will be essential reading for anyone concerned with the law, creativity, and the ever-broadening realm of new media.

The Rise of Global Health Joshua K. Leon 2015-02-10 Chronicles the expanding global effort to confront public health challenges. Since the year 2000, unprecedented resources have been committed to the complex challenge of developing global public health solutions by national governments, multilateral organizations, and civil society groups. This vast global movement is one of the most remarkable political phenomena of twenty-first-century international relations—but is it working? In *The Rise of Global Health*, Joshua K. Leon argues against the conventional wisdom, which argues that collective action on development issues—including controversial increases in foreign aid—is too inherently inefficient to succeed. Leon shows that public action on a global level can successfully pursue health equality. Often at the behest of grassroots activists, these disparate groups of actors are cooperating more than ever with the aim of improving our human potential through better health. Though operating at cross purposes with unequal trade agreements and other factors within the global economy harming the Global South, we learn something surprising about global health governance—it is evolving in ways more efficient than we think.

The Jungian Tarot and Its Archetypal Imagery Robert Wang 2017 In Volume II, Dr. Wang explores the imagery of The Jungian Tarot from the standpoints of archetypal symbolism, history, and comparative religion. **Memory Drawing** Darren R. Rousar 2013-03 From the Introduction: If you think about it, all life drawing and painting is at some point being done from the artist's memory, even if that memory is only a few seconds old. Every time the artist takes their eyes off of the model or scene and looks at their paper or canvas, their visual memory is involved. What if that artist's visual memory was highly trained? That artist might need the model for a shorter period of time, or she might have a more productive time when the model is in pose. He might be better at painting all of the fleeting effects that nature throws at us when we are landscape painting en plein air. Although I encourage you to consistently engage in memory-drawing practice, it should not supplant your regular art exercises. Memory-drawing ought to be done in addition to your regular art training, not instead of it. In a perfect world it would be integrated into traditional arts instruction, but the reality is that you will most likely be training your visual memory on your own. **Memory Drawing: Perceptual Training and Recall** exists to guide you in doing just that. It will also help you improve your abilities to remember fleeting effects, seize essentials, and even enhance your imagination.

Power and Care Tania Singer 2019-05-07 Leading thinkers from a range of disciplines discuss the compatibility of power and care, in conversation with the Dalai Lama. For more than thirty years, the Dalai Lama has been in dialogue with thinkers from a range of disciplines, helping to support pathways for knowledge to increase human wellbeing and compassion. These conversations, which began as private meetings, are now part of the Mind & Life Institute and Mind & Life Europe. This book documents a recent Mind & Life Institute dialogue with the Dalai Lama and others on two fundamental forces: power and care—power over and care for others in human societies. The notion of power is essentially neutral; power can be used to benefit others or to harm them, to build or to destroy. Care, on the other hand, is not a neutral force; it aims at increasing the wellbeing of others. Power and care are not incompatible: power, imbued with care, can achieve more than a powerless motivation to care; power, without the intention to benefit others, can be ruthless. The contributors—who include such celebrated figures as Frans B. M. de Waal, Olafur Eliasson, Sarah Blaffer Hrdy, and Jody Williams—discuss topics including the interaction of power and care among our closest relatives, the chimpanzees; the effect of meditation and mental training practices on the brain; the role of religion in promoting peace and compassion; and the new field of Caring Economics. Contributors Paul Collier, Brother Thierry-Marie Courau, Frans B. M. de Waal, Olafur Eliasson, Scilla Elworthy, Alexandra M. Freund, Tenzin Gyatso (His Holiness the Dalai Lama), Markus Heinrichs, Sarah Blaffer Hrdy, Frédéric Laloux, Alaa Murabit, Matthieu Ricard, Johan Rockström, Richard Schwartz, Tania Singer, Dennis J. Snower, Rabbi Awraham Soetendorp, Theo Sowa, Pauline Tangiora, Jody Williams

Securing Outer Space Natalie Bormann 2009-01-30 The challenges that space poses for political theory are profound. Yet until now, the exploration and utilization of space has generally reflected – but not challenged – the political patterns and impulses which characterized twentieth-century politics and International Relations. This edited volume analyses a number of controversial policies, and contentious strategies which have promoted space activities under the rubric of exploration and innovation, militarization and weaponization, colonization and commercialization. It places these policies and strategies in broader theoretical perspective in two key ways. Firstly, it engages in a reading of the discourses of space activities: exposing their meaning-producing practices; uncovering the narratives which convey certain space strategies as desirable, inevitable and seamless. Secondly, the essays suggest ways of understanding, and critically engaging with, the effects of particular space policies. The essays here seek to 'bring back space' into the realm of International Relations discourse, from which it has been largely removed, marginalized and silenced. The various chapters do this

by highlighting how activities in outer space are always connected to earth-bound practices and performances of the every day. **Securing Outer Space** will be of great interest to students of space power, critical security studies and IR theory.

Jung and the Postmodern Christopher Hauke 2013-10-23 What has Jung to do with the Postmodern? Chris Hauke's lively and provocative book, puts the case that Jung's psychology constitutes a critique of modernity that brings it in line with many aspects of the postmodern critique of contemporary culture. The metaphor he uses is one in which 'we are gazing through a Jungian transparency or filter being held up against the postmodern while, from the other side, we are also able to look through a transparency or filter of the postmodern to gaze at Jung. From either direction there will be a new and surprising vision.' Setting Jung against a range of postmodern thinkers, Hauke recontextualizes Jung's thought as a response to modernity, placing it - sometimes in parallel and sometimes in contrast to - various postmodern discourses. Including chapters on themes such as meaning, knowledge and power, the contribution of architectural criticism to the postmodern debate, Nietzsche's perspective theory of affect and Jung's complex theory, representation and symbolization, constructivism and pluralism, this is a book which will find a ready audience in academy and profession alike. **Life Lessons for Mastering the Law of Attraction** Jack Canfield 2013-02-05 Life Lessons for Mastering the Law of Attraction teaches you what you need to know about living the Law of Attraction and how to create your own personal success through its concepts.

The Essential Jesus John Dominic Crossan 2008-03-01 After his definitive *The Historical Jesus*, John Dominic Crossan delivered *Jesus: A Revolutionary Biography*--a popularized, bestselling account of what we can know about the life of Jesus. Here he offers the core of his life's work--

a concise and astonishing presentation of the authentic teachings and earliest images of the revolutionary Galilean sage. Crossan's fresh translations of Jesus' sayings show Jesus to be a teacher whose radical message that all are equal before God is as timely today as it was two thousand years ago. This picture is dramatically confirmed by the preConstantinian, Christian renderings of Jesus, which show that he was remembered by the first Christians not as God but as a revolutionary healer and leader.
