Going Home to the Fifties

Bill Yenne 2002 With the postwar economic boom, a vast middle class emerged. Suburbs exploded across the country, and the new industrial complex cranked out cars, appliances, and home furnishings in record

numbers. Here is an idealized neighborhood of the period, with schools, roads, and commuter trains to the homes, kitchens, and backyards -- all drawn from the fantasy worlds created by advertising. Color photos and illustrations are featured in this presentation of the ideal of 1950s suburban living. From houses to cars, to individual rooms and lawns, an

entire industry was created to instruct a newly-created middle class on what ideal living should be.

Homemaking for the

Apocalypse Jill E. Anderson
2021-04-22 In *Homemaking for the Apocalypse*, Jill E. Anderson interrogates patterns of Atomic Age conformity that controlled the domestic practices and private activities of Americans. Used as a way to promote security in a period rife with anxieties about nuclear annihilation and The Bomb, these narratives of domesticity were governed by ideals of compulsory normativity, and their circulation upheld the wholesale idealization of homemaking within a white, middle-class nuclear family and all that came along with it: unchecked reproduction, constant consumerism, and a general policing of practices deemed contradictory to normative American life. *Homemaking for the apocalypse* seeks out the disruptions to the domestic ideals found in memoirs, Civil Defense literature, the fallout

shelter debate, horror films, comics, and science fiction, engaging in elements of horror in order to expose how closely domestic practices are tied to dread and anxiety.

Homemaking for the Apocalypse offers a narrative of the Atomic Age that calls into question popular memory's acceptance of the conformity thesis and proposes new methods for critiquing the domestic imperative of the period by acknowledging its deep tie to horror.

Good Housekeeping 1936 Models for Writers Alfred Rosa 2012-01-05 It's a simple, best-selling combination that has worked for thousands of students — short, accessible essays and helpful, thorough writing instruction. Models for Writers continues to offer thought-provoking selections organized to demonstrate not only the rhetorical patterns that students will use in their own essays but also the elements and language that will make those essays effective. This edition offers more coverage of the key elements of academic writing, including new strategies for writing a research paper and a section on writing a reflective essay. Read the preface.

Creative Types Tom Bissell 2021-12-14 From the best-selling coauthor of *The Disaster Artist* and "one of America's best and most interesting writers" (Stephen King), a new collection of stories that range from laugh-out-loud funny to disturbingly dark--unflinching

portraits of women and men struggling to bridge the gap between art and life. A young and ingratiating assistant to a movie star makes a blunder that puts his boss and a major studio at grave risk. A long-married couple hires an escort for a threesome in order to rejuvenate their relationship. An assistant at a prestigious literary journal reconnects with a middle school frenemy and finds that his carefully constructed world of refinement cannot protect him from his past. A Bush administration lawyer wakes up on an abandoned airplane, trapped in a nightmare of his own making. In these and other stories, Tom Bissell vividly renders the complex worlds of characters on the brink of artistic and personal crises--writers, video-game developers, actors, and other creative types who see things slightly differently from the rest of us. With its surreal, poignant, and sometimes squirm-inducing stories, *Creative Types* is a brilliant new offering from one of the most versatile and talented writers

working in America today. *Writing for Computer Science* Justin Zobel 2004-06-03 A complete update to a classic, respected resource. Invaluable reference, supplying a comprehensive overview on how to undertake and present research.

Emily Post Laura Claridge 2008-10-14 "What would Emily Post do?" Even today, Americans cite the author of the perennial bestseller *Etiquette* as a touchstone for proper behavior. But who was the woman behind the myth, the authority on good manners who has outlasted all comers? Award-winning author Laura Claridge presents the first authoritative biography of the unforgettable woman who changed the mindset of millions of Americans, an engaging book that sweeps from the Gilded Age to the 1960s.

The Making of the English Middle Class Peter Earle 1989-01-01 This is the first major study of a neglected yet extremely significant subject: the London middle classes in the period between 1660 and

1730, a period in which they created a society and economy that can be seen with hindsight to have ushered in the modern world. Using a wealth of material from contemporary sources--including wills, business papers, inventories, marriage contracts, divorce hearings, and the writings of Daniel Defoe and Samuel Pepys--Peter Earle presents a fully rounded picture of the "middling sort of people," getting to the hearts of their lives as men and women struggling for success in the biggest, richest, and most middle-class city in contemporary Europe. He examines in fascinating and convincing detail the business life of Londoners, from apprenticeship through the problems and potential rewards of different occupational groups, going on to look at middle-class family, social, political and material life--from relationships with spouses, children, servants, and neighbors, to food and clothes and furniture, to sickness, death, and burial. Stimulating,

scholarly, and constantly illuminating, this book is an important and impressive contribution to English social history.

The Smitten Kitchen

Cookbook Deb Perelman
2012-10-30 NEW YORK TIMES
BEST SELLER • Celebrated food blogger and best-selling cookbook author Deb Perelman knows just the thing for a Tuesday night, or your most special occasion—from salads and slaws that make perfect side dishes (or a full meal) to savory tarts and galettes; from Mushroom Bourguignon to Chocolate Hazelnut Crepe. “Innovative, creative, and effortlessly funny.” —Cooking Light
Deb Perelman loves to cook. She isn’t a chef or a restaurant owner—she’s never even waitressed. Cooking in her tiny Manhattan kitchen was, at least at first, for special occasions—and, too often, an unnecessarily daunting venture. Deb found herself overwhelmed by the number of recipes available to her. Have you ever searched for the

perfect birthday cake on Google? You’ll get more than three million results. Where do you start? What if you pick a recipe that’s downright bad? With the same warmth, candor, and can-do spirit her award-winning blog, Smitten Kitchen, is known for, here Deb presents more than 100 recipes—almost entirely new, plus a few favorites from the site—that guarantee delicious results every time. Gorgeously illustrated with hundreds of her beautiful color photographs, The Smitten Kitchen Cookbook is all about approachable, uncompromised home cooking. Here you’ll find better uses for your favorite vegetables: asparagus blanketing a pizza; ratatouille dressing up a sandwich; cauliflower masquerading as pesto. These are recipes you’ll bookmark and use so often they become your own, recipes you’ll slip to a friend who wants to impress her new in-laws, and recipes with simple ingredients that yield amazing results in a minimum amount of time. Deb tells you her favorite summer cocktail;

how to lose your fear of cooking for a crowd; and the essential items you need for your own kitchen. From salads and slaws that make perfect side dishes (or a full meal) to savory tarts and galettes; from Mushroom Bourguignon to Chocolate Hazelnut Crepe Cake, Deb knows just the thing for a Tuesday night, or your most special occasion.

MFA vs NYC Chad Harbach 2014-02-25 Writers write—but what do they do for money? In a widely read essay entitled "MFA vs NYC," bestselling

novelist Chad Harbach (*The Art of Fielding*) argued that the American literary scene has split into two cultures: New York publishing versus university MFA programs. This book brings together established writers, MFA professors and students, and New York editors, publicists, and agents to talk about these overlapping worlds, and the ways writers make (or fail to make) a living within them. Should you seek an advanced degree, or will workshops smother your style? Do you need to move to New York, or will the high cost of living undo you? What's worse—having a day job or not having health insurance? How do agents decide what to represent? Will Big Publishing survive? How has the rise of MFA programs affected American fiction? The expert contributors, including George Saunders, Elif Batuman, and Fredric Jameson, consider all these questions and more, with humor and rigor. *MFA vs NYC* is a must-read for aspiring writers, and for anyone interested in the present and

future of American letters.

Handbook of Humidity Measurement, Volume 1

Ghenadii Korotcenkov

2018-03-15 The first volume of *The Handbook of Humidity Measurement* focuses on the review of devices based on optical principles of measurement such as optical UV, fluorescence hygrometers, optical and fiber-optic sensors of various types. Numerous methods for monitoring the atmosphere have been developed in recent years, based on measuring the absorption of electromagnetic field in different spectral ranges. These methods, covering the optical (FTIR and Lidar techniques), as well as a microwave and THz ranges are discussed in detail in this volume. The role of humidity-sensitive materials in optical and fiber-optic sensors is also

detailed. This volume describes the reasons for controlling the humidity, features of water and water vapors, and units used for humidity measurement.

The Study of Fast Processes and Transient Species by Electron Pulse Radiolysis J.H.

Baxendale 2012-12-06 This volume contains the lectures given at the NATO Advanced Study Institute "The Study of Fast Processes and Labile Species in Chemistry and Molecular Biology Using Ionising Radiation" held in Capri, Italy, September 7-18th 1981. The aim of the Institute was to summarise the present position of the use of pulsed ionising radiation in chemical and biological chemical research. For background an outline of the basic radiation chemistry and physics involved and descriptions of techniques and equipment in current use was presented. It was followed by comprehensive coverage of the state of this research to date in various areas of chemistry and biological chemistry. It was hoped to demonstrate to

researchers not directly involved with ionising radiation how this technique is now at a stage in its development where it can have wider applications in various branches of chemistry and biology. The fifty participants did indeed form a wide spectrum of scientific interest covering inorganic, physical and organic chemistry, molecular physics, molecular biology, radiobiology and bacteriology. They also represented a wide variety of countries viz. Belgium, China, Denmark, France, Germany, Greece, Holland, Hungary, India, Italy, Poland, Turkey, U.S.A., U.K. and Yugoslavia.

American Prisoners of the Revolution Danske Dandridge

1911 Liberty Street Sugar House was a tall, narrow building five stories in height, and with dismal underground dungeons. In this gloomy abode jail fever was ever present. In the hot weather of July, 1777, companies of twenty at a time would be sent out for half an hour's outing, in the court yard. Inside groups of six stood for ten minutes at a time at the

windows for a breath of air.

The Grand Domestic Revolution
Dolores Hayden 1982-06-17

"This is a book that is full of things I have never seen before, and full of new things to say about things I thought I knew well. It is a book about houses and about culture and about how each affects the other, and it must stand as one of the major works on the history of modern housing." - Paul Goldberger, The New York Times Book Review Long before Betty Friedan wrote about "the problem that had no name" in *The Feminine Mystique*, a group of American feminists whose

leaders included Melusina Fay Peirce, Mary Livermore, and Charlotte Perkins Gilman campaigned against women's isolation in the home and confinement to domestic life as the basic cause of their unequal position in society. *The Grand Domestic Revolution* reveals the innovative plans and visionary strategies of these persistent women, who developed the theory and practice of what Hayden calls "material feminism" in pursuit of economic independence and social equality. The material feminists' ambitious goals of socialized housework and child care meant revolutionizing the American home and creating community services. They raised fundamental questions about the relationship of men, women, and children in industrial society. Hayden analyzes the utopian and pragmatic sources of the feminists' programs for domestic reorganization and the conflicts over class, race, and gender they encountered. This history of a little-known intellectual tradition

challenging patriarchal notions of "women's place" and "women's work" offers a new interpretation of the history of American feminism and a new interpretation of the history of American housing and urban design. Hayden shows how the material feminists' political ideology led them to design physical space to create housewives' cooperatives, kitchenless houses, day-care centers, public kitchens, and community dining halls. In their insistence that women be paid for domestic labor, the material feminists won the support of many suffragists and of novelists such as Edward Bellamy and William Dean Howells, who helped popularize their cause. Ebenezer Howard, Rudolph Schindler, and Lewis Mumford were among the many progressive architects and planners who promoted the reorganization of housing and neighborhoods around the needs of employed women. In reevaluating these early feminist plans for the environmental and economic transformation of American

society and in recording the vigorous and many-sided arguments that evolved around the issues they raised, Hayden brings to light basic economic and spacial contradictions which outdated forms of housing and inadequate community services still create for American women and for their families.

Make Room for TV Lynn Spigel
2013-11-26 Between 1948 and 1955, nearly two-thirds of all American families bought a television set—and a revolution in social life and popular culture was launched. In this fascinating book, Lynn Spigel chronicles the enormous impact of television in the formative years of the new medium: how, over the course of a single decade, television became an intimate part of everyday life. What did Americans expect from it? What effects did the new daily ritual of watching television have on children? Was television welcomed as an unprecedented "window on the world," or as a "one-eyed monster" that would disrupt households and corrupt

children? Drawing on an ambitious array of unconventional sources, from sitcom scripts to articles and advertisements in women's magazines, Spigel offers the fullest available account of the popular response to television in the postwar years. She chronicles the role of television as a focus for evolving debates on issues ranging from the ideal of the perfect family and changes in women's role within the household to new uses of domestic space. The arrival of television did more than turn the living room into a private theater: it offered a national stage on which to play out and resolve conflicts about the way Americans should live. Spigel chronicles this lively and contentious debate as it took place in the popular media. Of particular interest is her treatment of the way in which the phenomenon of television itself was constantly deliberated—from how programs should be watched to where the set was placed to whether Mom, Dad, or kids should control the dial. Make

Room for TV combines a powerful analysis of the growth of electronic culture with a nuanced social history of family life in postwar America, offering a provocative glimpse of the way television became the mirror of so many of America's hopes and fears and dreams. Laser Science and Technology
A.N. Chester 2012-12-06 The conference "Laser Science and Technology" was held May 11-19, 1987 in Erice, Sicily. This was the 12th conference organized by the International School of Quantum Electronics, under the auspices of the "Ettore Majorana" Center for Scientific Culture. This volume contains both the invited and contributed papers presented at the conference, covering current research work in two areas: new laser sources, and laser applications. The operation of the first laser by Dr. Theodore Maiman in 1960 initiated a decade of scientific exploration of new laser sources. This was followed by the decade of the 1970s, which was characterized by "technology push" in which the

discoveries of the 1960s were seeking practical application. In the 1980s we are instead seeking "applications pull," in which the success and rapid maturing of laser applications provides both inspiration and financial resources to stimulate additional work both on laser sources and applications. The papers presented in these Proceedings attest to the great vitality of research in both these areas: New Laser Sources. The papers describe current developments in ultra violet excimer lasers, X-ray lasers, and free electron lasers. These new lasers share several characteristics: each is a potentially important coherent source; each is at a relatively short wavelength (below 1 micrometer); and each is receiving significant development attention today.
