The organization of the Workbook parallels that of the main text and it also provides useful review for students. The Workbook offers further practice of each chapter's vocabulary and grammatical structures through form-

based exercises including sentence-building activities, completion exercises, fill-ins, and realia-based activities. The Lab Manual activities are used in conjunction with the Audioprogram recordings of listening comprehension passages. Listening strands include recordings of authentic conversations, interviews, announcements, news reports, and so on. A variety of comprehension-check and information-processing activities follow each listening passage. Answers to these activities are found at the end of the Workbook/Lab Manual.

Driving from Japan Wanda James 2005-01-01 This study chronicles the success of the Japanese car in America. Starting with Japan's first gasoline-powered car, the Takuri, it examines early Japanese inventors and automotive conditions in Japan; the arrival of Japanese cars in California in the late 1950s; consumer and media reactions to Japanese manufacturers; what obstacles they faced; initial sales; and how the cars

gained popularity through shrewd marketing. Toyota, Honda, Datsun (Nissan), Mazda, Subaru, Isuzu, and Mitsubishi are profiled individually from their origins through the present. An examination follows of the forced cooperation between American and Japanese manufacturers, the present state of the industry in America, and the possible future of this union, most importantly in the race for a more environmentally-sound vehicle.
