Perceptual Organization Michael Kubovy
2017-03-31 Originally published in 1981, perceptual organization had been synonymous with Gestalt psychology, and Gestalt psychology had fallen into disrepute. In the heyday of Behaviorism, the few cognitive psychologists of the time pursued Gestalt phenomena. But in 1981, Cognitive Psychology was married to Information Processing. (Some would say that it was a marriage of convenience.) After the wedding, Cognitive Psychology had come to look like a theoretically wrinkled Behaviorism; very few of the mainstream topics of Cognitive Psychology made explicit contact with Gestalt phenomena. In the background, Cognition's first love - Gestalt - was pining to regain favor. The cognitive psychologists' desire for a phenomenological and intellectual interaction with Gestalt psychology did not manifest itself in their publications, but it did surface often enough at the Psychonomic Society meeting in 1976 for them to remark upon it in one of their conversations. This book, then, is the product of the editors' curiosity about the status of ideas at the time, first proposed by Gestalt psychologists. For two days in November 1977, they held an exhilarating symposium that was attended by some 20 people, not all of whom are represented in this volume. At the end of our symposium it was agreed that they would try, in contributions to this volume, to convey the

speculative and metatheoretical ground of their research in addition to the solid data and carefully wrought theories that are the figure of their research.

Where You Are Tucora Monique
2020-01-15 Kross Karmar is wedged between faith and fear. After surviving a traumatic event that headlined her city's newspaper, the multi-talented beauty is unable to withstand large crowds and is paralyzed by the thought of history repeating itself. Shielding her mental stability and tucking away the will to rejoin the world, Kross becomes accustomed to her hermit lifestyle. However, with family, friends and a new delivery man vying for her affection; the eclectic music columnist has begun to wonder, is her lonely more peaceful than love? Hollis Brown is seemingly satisfied with lust occupying the space for intimacy. Years of twisted betrayal and deceitful partners have emptied the businessman's patience and faith in women. Outside of his daughter and Brown Brothas, nothing else matters. And yet, a lucrative wager amongst friends shifts the stern boss's focal and reintroduces second chances to a man who doesn't usually believe in re-dos. Both canvassing between intuition and insecurities, will Kross and Hollis be able to find solace in the space between?

Contents include "What the Stockholders Read," "The GX-1," "The GX-2," "The PD-4501," and "Could I Own A Scenicruiser?" Reviewer comments, "It is a masterpiece ... the research you have done on the book is fantastic." (Bill Luke, author) "It is a monumental work..." (Doc Rushing) ..". best book written on the Scenicruiser." (Scenicruiser owner)

The Discipline of Organizing:

Professional Edition Robert J. Glushko 2014-08-25 Note about this ebook: This ebook exploits many advanced capabilities with images, hypertext, and interactivity and is optimized for EPUB3-compliant book readers, especially Apple's iBooks and browser plugins. These features may not work on all ebook readers. We organize things. We organize information, information about things, and information about information. Organizing is a fundamental issue in many professional fields, but these fields have only limited agreement in how they approach problems of organizing and in what they seek as their solutions. The Discipline of Organizing synthesizes insights from library science, information science, computer science, cognitive science, systems analysis, business, and other disciplines to create an Organizing System for understanding organizing. This framework is robust and forward-looking, enabling effective sharing of insights and design patterns between disciplines that weren't possible before. The Professional Edition includes new and revised content about the active resources of the "Internet of Things," and how the field of Information Architecture can be viewed as a subset of the discipline of organizing. You'll find: 600 tagged endnotes that connect to one or more of the contributing disciplines Nearly 60 new pictures and illustrations Links to cross-references and external citations Interactive study guides to test on key points The Professional Edition is ideal for practitioners and as a primary or

supplemental text for graduate courses on information organization, content and knowledge management, and digital collections. FOR INSTRUCTORS: Supplemental materials (lecture notes, assignments, exams, etc.) are available at <http://disciplineoforganizing.org>. FOR STUDENTS: Make sure this is the edition you want to buy. There's a newer one and maybe your instructor has adopted that one instead.

20,000 Miles South Helen Schreider 2017-07-31 Helen and Frank Schreider were true adventurers. Their dream was to drive the length of the Americas, from the town of Circle, Alaska (just outside the Arctic Circle), to the world's southernmost town, Ushuaia, in Tierra del Fuego. Dinah, their German shepherd, went with them. They are the first people in history to have made this trip. They came back with a whale of a story. The seagoing and mountain-climbing abilities of their amphibious jeep, La Tortuga, were put to a rugged test during the eighteen thrill-packed months the Schreiders were under way. They didn't just drive from Circle to Ushuaia—much of the way there are no roads. Many of the rivers that slice through the jungle are unbridged; the jungle itself often rears up in an impenetrable wall, and the natives just shake their heads and say, "Turn back." Undaunted, the Schreiders hacked their way with machetes through the steaming jungles of southern Mexico, were forced to put out through the monstrous surf into the far from pacific Pacific, island-hopped across the reef-ribbed Caribbean, rode out a hurricane at sea, and crawled to almost sixteen thousand feet in the Peruvian Andes. They are the first to have reached South America in a wheeled vehicle under its own power. La Tortuga served them well and came away with her share of honors: she's the first "ship" ever to have been weighed in on dry land for passage through the Panama Canal and to have driven up to the port captain's door to pick up her pilot. *20,000 MILES SOUTH* is a book filled with the happy glow of discovery, the ease, charm, and determination of its young authors, and the

fascinations and romance of faraway places. *Accelerators in Silicon Valley*: Peter Ester 2018-01-31 Silicon Valley is the world's most successful innovation region. Apple, Google, Facebook, Instagram, Twitter, WhatsApp, Uber, and Airbnb changed our way of living. Silicon Valley has built a brilliant ecosystem that supports startups. Its entrepreneurial mindset fosters risk-taking, thinking big, and sharing. A fast growing number of accelerators in Silicon Valley help startups by bringing their product to the market, refining their business idea, developing their product, strengthening their team, designing a marketing strategy, getting first customers and traction, raising funds, and coping with the hardships of startup life. In *Accelerators in Silicon Valley* Peter Ester describes how these 'schools of startup entrepreneurship' operate and empower startups. What can we learn from how Silicon Valley accelerators help startups to become successful companies? This book gives the answer. *Accelerators in Silicon Valley* is a book for those who share a fascination for building the new startup economy.

Murder in the Delta Michael Joseph Miller 2019-11-14 The story of Emmett Till is a riveting, notorious murder case that gave birth to the modern-day civil rights

movement, a story that continues to generate enormous interest from the general public and the media at large. This is a dynamic and explosive story of courage, determination, and faith, which gave rise to several award-winning documentaries and honorable mentions in several major motion pictures and television miniseries, such as the miniseries King, based on the life of Dr. Martin Luther King Jr.; the motion picture Mississippi Burning; as well as For Us the Living: The Medger Evers Story, The Rosa Parks Story, and the theatrical release of the film Ali, a story on the life of Muhammad Ali, just to name a few.

Tractors Nick Baldwin 2011-11-20 Steam, and then cumbersome motor, tractors existed in small numbers before 1914, after which the need to produce more foods using less horse and man power saw the origins of the machine we know today. Thanks to mass production, Ford brought the price down to suit average farmers, and in the 1920s to 1940s numerous rivals brought in such novelties as diesel engines, pneumatic tyres, hydraulic implement lifts and even cost-effective all-wheel drive and weather protection. After the Second World-War, a strong new indigenous tractor industry was led by Ferguson, David Brown, Nuffield and Ford. This book highlights these developments and goes on to show the dramatic improvements of the 1950s and 1960s.

Morris Minor 1000 2012-03-01 The Morris Minor 1000, which retained many of its predecessors characteristics was a huge success following its launch at the London Motor Show in 1956. Unicorn Activity Book for Kids Ages 4-8 Activity Martin 2020-11-28 A Gorgeous Unicorn Activity Book For Kids Ages 4-8!!!
21st Century Sports Sascha L. Schmidt 2020-09-12 This book outlines the effects

that technology-induced change will have on sport within the next five to ten years, and provides food for thought concerning what lies further ahead. Presented as a collection of essays, the authors are leading academics from renowned institutions such as Massachusetts Institute of Technology, Queensland University of Technology, and the University of Cambridge, and practitioners with extensive technological expertise. In their essays, the authors examine the impacts of emerging technologies like artificial intelligence, the Internet of Things, and robotics on sports and assess how they will change sport itself, consumer behavior, and existing business models. The book will help athletes, entrepreneurs, and innovators working in the sports industry to spot trendsetting technologies, gain deeper insights into how they will affect their activities, and identify the most effective responses to stay ahead of the competition both on and off the pitch.

The Responsibilities of Online Service Providers Mariarosaria Taddeo 2017-01-27 This volume focuses on the responsibilities of online service providers (OSPs) in contemporary societies. It examines the complexity and global dimensions of the rapidly evolving and serious challenges posed by the exponential development of Internet services and resources. It looks at the major actors - such as Facebook, Google, Twitter, and Yahoo! - and their significant influence on the informational environment and users' interactions within it, as well as the responsibilities and liabilities such influence entails. It discusses the position of OSPs as information gatekeepers and how they have gone from offering connecting and information-sharing services to paying members to providing open, free infrastructure and applications that facilitate digital expression and the communication of information. The book seeks consensus on the principles that should shape OSPs' responsibilities and practices, taking into account business ethics and policies. Finally, it discusses the

rights of users and international regulations that are in place or currently lacking.

War Stories Elizabeth Mullener 2002-04-01 Henry Lasoski, an officer in the Polish army, was there on the first day of World War II, thrusting his bayonet awkwardly into a German soldier hours after Hitler's army invaded his homeland in 1939. And Jacques Smith was there on the last, a member of the honor guard aboard the USS Missouri in Tokyo Bay when the Japanese signed the documents of surrender in 1945. From start to finish, this chronicle of fifty-three personal testimonies illuminates the Second World War in a way no mere accumulation of facts can. In a journalistic tour de force, Elizabeth Mullener over the course of twelve years found eyewitnesses to virtually every major event of World War

II, and she found them all in one American city—New Orleans. Some are natives of the city and some are not, a testament to the upheaval of war and its power to scatter people around the globe. The people she writes about are not grand heroes or prime movers. They are young men shaking in their foxholes, young women stitching up wounded soldiers, and children facing a world gone topsy-turvy. And they saw it all. They witnessed the London Blitz and the siege of Stalingrad; the attack on Pearl Harbor and the Bataan Death March; the battle of Iwo Jima and the Nuremberg trials; the Normandy invasion and parties at the USO. Their memories are powerful. Harold Eck recalls sharks grazing his legs as he treaded water for four days after the USS Indianapolis sank in the Pacific Ocean. Anthony DeLucca saw bodies stacked like cordwood at Buchenwald. Christine Strevinsky slid a knife through the neck of a Nazi commandant at the age of nine. Frank Rosato played "The Missouri Waltz" for Harry Truman at Potsdam. All poignantly related through Mullener's graceful and compelling prose, the episodes in War Stories provide an unusually intimate history of World War II and a direct, visceral connection to the central event of the twentieth century.

Computer Networking James F. Kurose 2006-07 Computer Networking provides a top-down approach to this study by beginning with applications-level protocols and then working down the protocol stack. Focuses on a specific motivating example of a network—the Internet—as well as introducing students to protocols in a more theoretical context. New short "interlude" on "putting it all together" that follows the coverage of application, transport, network, and datalink layers ties together the various components of the Internet architecture and identifying aspects of the architecture that have made the Internet so successful. A new chapter covers wireless and mobile networking, including in-depth coverage of Wi-Fi, Mobile IP and GSM. Also included is expanded coverage on BGP, wireless security and DNS. This book is designed for

readers who need to learn the fundamentals of computer networking. It also has extensive material, on the very latest technology, making it of great interest to networking professionals.

Stirling Engine Design Manual William Martini 2013-01-25 For Stirling engines to enjoy widespread application and acceptance, not only must the fundamental operation of such engines be widely understood, but the requisite analytic tools for the stimulation, design, evaluation and optimization of Stirling engine hardware must be readily available. The purpose of this design manual is to provide an introduction to Stirling cycle heat engines, to organize and identify the available Stirling engine literature, and to identify, organize, evaluate and, in so far as possible, compare non-proprietary Stirling engine design methodologies. This report was originally prepared for the National Aeronautics and Space Administration and the U. S. Department of Energy.

The Bottom Billion Paul Collier 2007-05-25 Global poverty is falling quite rapidly for about eighty percent of the world. The real crisis lies in a group of about 50 failing states, the bottom billion, whose problems defy traditional approaches to alleviating poverty. The causes of failure include civil war, dependence on the export of natural resources, and bad governance. Standard

solutions do not work against these traps, Collier writes; aid is often ineffective, and globalization can actually make matters worse. What the bottom billion need, he argues, is a bold new plan supported by the Group of Eight industrialized nations. In *The Bottom Billion*, Collier offers real hope for solving one of the great humanitarian crises facing the world today.

The Discipline of Organizing:

Informatics Edition Robert J. Glushko 2016-08-05 We organize things. We organize information, information about things, and information about information. Organizing is a fundamental issue in many professional fields, but these fields have only limited agreement in how they approach problems of organizing and in what they seek as their solutions. The *Discipline of Organizing* synthesizes insights from library science, information science, computer science, cognitive science, systems analysis, business, and other disciplines to create an Organizing System for understanding organizing. This framework is robust and forward-looking, enabling effective sharing of insights and design patterns between disciplines that weren't possible before. The 4th edition of this award-winning and widely adopted text adds content to bridge between the foundations of organizing systems and the new statistical and computational techniques of data science because at its core, data science is about how resources are described and organized. The 4th edition reframes descriptive statistics as organizing techniques, expands the treatment of classification to include computational methods, and incorporates many new examples of data-driven resource selection, organization, maintenance, and personalization. The Informatics edition contains all the new content related to data science, but omits the discipline-specific content about library science, museums, and document archives.

Greyhound Scenicruiser Tom McNally 2013-03-01 When we deem things iconic, they have naturally become part of history and have earned a permanent status of importance to us—one such object is a particular intercity coach, the Greyhound PD-4501 Scenicruiser bus, built by the GM Corporation during 1954-'56. After nearly 60 years, its popularity, even today, is almost cult-like. Throughout the history of intercity coaches in the U.S., there have not been more toys, advertising pieces, souvenirs, or memorabilia centered on any other bus. The Scenicruiser starred in several movies, was featured on record album covers, and appeared on endless TV shows through the years. Starting with prototypes, this book covers all the various models of the Scenicruiser's heritage, and even highlights many of the restored and still operating legends today.

Robert Smithson Ann Reynolds 2004-10-01 An examination of the interplay between cultural context and artistic practice in the work of Robert Smithson. Robert Smithson (1938-1973) produced his best-known work during the 1960s and early 1970s, a period in which the boundaries of the art world and the objectives of art-making were questioned perhaps more consistently and thoroughly than any time before or since. In *Robert Smithson*, Ann Reynolds elucidates the complexity of Smithson's work and thought by placing them in their historical context, a context greatly enhanced by the vast archival materials that Smithson's widow, Nancy Holt, donated to the Archives of American Art in 1987. The archive provides Reynolds with the remnants of Smithson's working life—magazines, postcards from other artists, notebooks, and perhaps most important, his library—from which she reconstructs the physical and conceptual world that Smithson inhabited. Reynolds explores the relation of Smithson's art-making, thinking about art-making, writing, and interaction with other artists to the articulated ideology and discreet

assumptions that determined the parameters of artistic practice of the time. A central focus of Reynolds's analysis is Smithson's fascination with the blind spots at the center of established ways of seeing and thinking about culture. For Smithson, New Jersey was such a blind spot, and he returned there again and again—alone and with fellow artists—to make art that,

through its location alone, undermined assumptions about what and, more important, where, art should be. For those who guarded the integrity of the established art world, New Jersey was "elsewhere"; but for Smithson, "elsewheres" were the defining, if often forgotten, locations on the map of contemporary culture.
