Manual of Romance Phonetics and Phonology Christoph Gabriel 2021-11-22 This handbook is structured in two parts: it provides, on the one hand, a comprehensive (synchronic) overview of the phonetics and phonology (including prosody) of a breadth of Romance languages and focuses, on the other hand, on central topics of research in Romance segmental and suprasegmental phonology, including comparative and diachronic perspectives. Phonetics and phonology have always been a core discipline in Romance linguistics: the wide synchronic variety of languages and dialects derived from spoken Latin is extensively explored in numerous corpus and atlas projects, and for quite a few of these varieties there is also more or less ample documentation of at least some of their diachronic stages. This rich empirical database offers excellent testing grounds for different theoretical approaches and allows for substantial insights into phonological structuring as well as into (incipient, ongoing, or concluded) processes of phonological change. The volume can be read both as a state-of-the-art report of research in the field and as a manual of Romance languages with special emphasis on the key topics of phonetics and phonology.

The News Alain de Botton 2014-02-06 Alain de Botton explores our relationship with 'the news' in this book full of his trademark wit and wisdom. Following on from his bestselling Religion for Atheists, Alain de Botton turns now to look at the manic and peculiar positions that 'the news' occupies in our lives. We invest it with an authority and importance which used to be the preserve of religion - but what does it do for us? Mixing current affairs with philosophical reflections, de Botton offers a brilliant illustrated guide to the precautions we should take before venturing anywhere near the news and the 'noise' it generates. Witty and global in reach, The News will ensure you'll never look at reports of a celebrity story or political scandal in quite the same way again. Praise for Religion for Atheists: 'Smart and stimulating . . . a sensitive analysis of the deeply human

needs that faith meets' Financial Times 'A serious and optimistic set of practical ideas that could improve and alter the way we live . . . energetic and on the side of the angels' Jeanette Winterson, The Times 'Packed with tantalising goads to thought and playful prompts to action' Independent Alain de Botton's bestselling books include Religion for Atheists, How Proust Can Change Your Life, The Art of Travel, and The Architecture of Happiness. He lives in London and founded The School of Life (www.theschooloflife.com) and Living Architecture (www.living-architecture.co.uk). For more information, consult www.alaindebotton.com.

Language Policy and Planning in the Mediterranean World Marilena Karyolemou 2014-08-11 Language Policy and Planning in the Mediterranean World is a collection of the best papers presented at the MedLPLP conference held at the University of Cyprus in 2009, enriched with invited contributions on the same topic. The book presents a panorama of situations with countries such as France, Germany, Cyprus, Malta, Italy, Spain, Poland, Turkey, Greece, Bulgaria, Albania, Romania and Serbia. It explores various aspects of the weight and ecology of the Mediterranean languages, discusses LPP in the light of international law and the protection of human rights, bilingual education and foreign language acquisition policies. It also addresses the issue of feminization in a broad range of Mediterranean languages comparing French, Italian, Spanish, and, for the first time, Standard and Cypriot Greek. Finally, the book also discusses language revival and renovation policies, language planning in the public space, as well as cases of micro-language management. The volume is an excellent source of information for scholars and students of LPP interested in the synchrony and diachrony of Mediterranean languages, in aspects of LPP activity in various Mediterranean countries and in specific LPP processes involving several languages within the area.

The Linux Command Line William E. Shotts, Jr. 2012 You've experienced the shiny, point-and-click surface of your Linux computer—now dive below and explore its depths with the power of the command line. The Linux Command Line takes you from your very first terminal keystrokes to writing full programs in Bash, the most popular Linux shell. Along the way you'll learn the timeless skills handed down by generations of gray-bearded, mouse-shunning gurus: file navigation, environment configuration, command chaining, pattern matching with regular expressions, and more. In addition to that practical knowledge, author William Shotts reveals the philosophy behind these tools and the rich heritage that your desktop Linux machine has inherited from Unix supercomputers of yore. As you make your way through the book's short, easily-digestible chapters, you'll learn how to: * Create and delete files, directories, and symlinks * Administer your system, including networking, package installation, and process management * Use standard input and output, redirection, and pipelines * Edit files with Vi, the world's most popular text editor * Write shell scripts to automate common or boring tasks * Slice and dice text files with cut, paste, grep, patch, and sed Once you overcome your initial "shell shock," you'll find that the command line is a natural and expressive way to communicate with your computer. Just don't be

surprised if your mouse starts to gather dust. A featured resource in the Linux Foundation's "Evolution of a SysAdmin"

Jazz Composition and Arranging in the Digital Age Richard Sussman 2012 Jazz Composition and Arranging In the Digital Age is a comprehensive and practical instructional book and reference guide on the art and craft of jazz composition and arranging for small and large ensembles. In this book, veteran composers and arrangers Richard Sussman and Michael Abene combine their extensive years of experience as musicians and instructors to demonstrate how advances in music technology and software may be integrated with traditional compositional concepts to form a new and more efficient paradigm for the creative process. This book builds on material and issues treated in traditional jazz composition and arranging courses, including all the fundamental musical techniques and information associated with jazz arranging and composition instruction. In addition, each chapter of the book also contains specific examples demonstrating the effective utilization of music software as applied to the realization of these techniques. Software is employed both as both a learning tool in the form of examples and exercises, and as a practical tool illustrating how many modern day composer/arrangers are utilizing these techniques successfully in the real world. The book also offers several chapters devoted exclusively to the creative use of music technology and software. The extensive companion website provides listening examples for each chapter as well as enhanced software tips, expanded and additional music examples, and appendices of , basic principles and an expanded recommended listening list for further study.

Sustainable Living with Environmental Risks Nobuhiro Kaneko 2014-03-11 We are not free from environmental risks that accompany the development of human societies. Modern economic development has accelerated environmental pollution, caused loss of natural habitats, and modified landscapes. These environmental changes have impacted natural systems: water and heat circulation, nutrient cycling, and biodiversity. These changes in natural systems degrade ecosystem services and subsequently increase environmental risks for humans. Environmental risks, therefore, are not only human health risks by pollution, climatic anomalies and natural disasters, but also degradation of ecosystem services on which most people are relying for their lives. We cannot entirely eliminate the risks, because it is not possible to attain zero impact on the environment, but we need to find a mechanism that minimizes environmental risks for human sustainably. This is the idea of the interdisciplinary framework of "environmental risk management" theory, which advocates harmony between economic development and environmental conservation. Based on this theory, the Sustainable Living with Environmental Risk (SLER) programme, adopted by the Japanese Ministry of Education (MEXT) as one of its strategic programmes, has been training graduate students at the Yokohama National University, Japan, from 2009 to 2013 to become future environmental leaders who will take the initiative in reducing the level of environmental risks and in protecting natural resources in the developing nations of Asia and Africa. This book provides students and teachers of this new academic field with a comprehensive coverage of case studies of environmental risks and their practical management technologies not only in Japan but also in developing nations in Asia and Africa.

Zooplankton Diversity and Pelagic Food Webs Marina Manca 2021-05-04 Zooplankton are of key importance in the structure and functioning of aquatic food webs. They contribute to a large part of the functional and structural biodiversity of predator and prey plankton communities. Promptly responding to long-term and seasonal changes in the physical and chemical environment, they are sensitive indicators of patterns and mechanisms of impact drivers, both natural and human induced. In this volume, we aim to present evidence for both long-term and seasonal changes in zooplankton community structure and dynamics, investigating different approaches from population dynamics to advanced molecular techniques and reconstructing past communities from subfossil remains in lake sediments.

Recognition in Mozart's Operas Jessica Waldoff 2006-04-13 'Recognition in Mozart's Operas' is a thoughtful treatise that uses both literary and musicological methods to illuminate some of Mozart's best-loved operas. Waldoff argues that, rather than offering the simple happy endings or tragic climaxes of 'easier' operas, many of Mozart's work features scenes of recognition-moments.

Beethoven David Benjamin Levy 2003-01-01 Beethoven's Ninth Symphony, a masterpiece that has influenced virtually every Western composer since its premiere, has become associated with the marking of momentous public occasions. In 1989, Chinese students played its finale through loudspeakers in Tiananmen Square, and Leonard Bernstein led a performance in Berlin to celebrate the razing of the Berlin Wall. This lively and up-to-date book focuses on Beethoven's Ninth, exploring the cultural and musical meanings that surround this powerful work of genius. David B. Levy sets the scene with a brief survey of nineteenth-century Germanic culture and society, then analyzes the Ninth symphony in detail with special emphasis on the famous choral finale. He discusses the initial performances in 1824 under Beethoven's direction and traces the symphony's critical reception and legacy. In the final chapter of the book, Levy examines interpretations of the work by prominent conductors, including Wagner, Mahler, and Weingartner. A fully annotated discography of selected recordings completes this comprehensive volume.

Gustav and Alma Mahler Susan M. Filler 2012-12-06 This revised edition of

Garland's 1989 publication updates the core bibliography on Gustave Mahler (as well as his spouse and fellow composer Alma Mahler) by incorporating new research gathered over the past dozen years on his life and professional works. Gustave Mahler, renowned conductor and composer of symphonies and song cycles, is one of the foremost musical figures of the late nineteenth and early twentieth centuries. His symphonies continue to be widely performed and studied through the twenty-first century. Organized in sections according to subject matter, references are arranged alphabetically by the names of authors or editors. Filler's research has produced sources for musicologists and students in nineteen languages, offering a resource that expands traditional English-language music scholarship.
