Rebalancing Public Partnership John Brothers 2016-03-03 In the US, as in many other Western economies, federal and state government is working to become more involved with the nonprofit sector; a sector in which many of the organizations are singularly ill-prepared and strategically unaligned to fulfill the new role that is being asked of them. Based on his original research, John Brothers brings together leading thought leaders from the United States and around the world by exploring the prevailing attitudes and perceptions of the nonprofit sector towards government and vice versa and provides advice and direction to help both sides of the equation towards effective collaborative working. The main themes cover the nature and implications of regulatory reform on the sector and how non-government organizations should reengineer their practices. There are also chapters on some of the hot button areas of government contracting and political advocacy. The text includes best-practice examples, case studies as well as tools and templates from across the sectors. Both sides of this emerging partnership need fast-track education on each other's capabilities, constraints and working practice. Dr Brothers' contributors provide some very valuable perspectives and insights that should inform and direct this process.

Solution-based Casework William C. Barrett
2020-08-14 Solution-based casework is an approach to assessment, case planning, and case management that combines what we know from clinical social work with what we value about sound social work practice. It is grounded in family-centered social work and draws from clinical approaches within social work and mental health. By integrating problem- and solution-focused approaches that form the clinical and social work traditions, treatment partnerships are more easily formed between family, caseworker, and service provider. Solution-Based Casework is a skill-based, practice-oriented text that provides the specific guidance that students and new practitioners need in order to make sense quickly of the complex tasks of assessment and case planning in child welfare. The book flows out of a long practice experience, and was developed in consultation with workers and supervisors who were attempting to remedy problems viewed as contributing to recurrent abuse and neglect. It seeks to end adversarial relationships in casework and advocates case plans based on specific outcome skills rather than on those written with vague outcome goals measuring attendance in counseling. It serves as a common conceptual framework for integrating disparate segments of a response network, thereby allowing all providers in a therapeutic system to work toward common goals. The text is divided into three sections. In Section I the conceptual history and theoretical foundations of solution-based casework are presented so that the reader can place this approach to casework within the ongoing professional conversation about what constitutes sound practice. Section II addresses issues of assessment and case planning. Section III focuses on case management issues and how treatment team members experience a solution-based casework approach.
