A Focus on Gender Sunita Kishor 2005 This report presents a collection of six working papers on the dynamics of gender in developing countries. The papers, commissioned by the MEASURE DHS project, were prepared by researchers recognized for their work in the areas of demography, reproductive health, and gender. The analyses presented are based on data from the Demographic and Health Surveys (DHS) project. Funding was provided by the U.S. Agency for International Development (US AID). A common theme of several of the papers is the struggle to define women's empowerment and/or autonomy and then to adequately measure it. Five of the working papers in this volume focus on the gender questions in the core DHS questionnaire, particularly the questions on household decision making and women's autonomy and empowerment, and their relationship to different population, health, and nutrition (PHN) outcomes of interest. The last paper examines whether PHN outcomes of interest vary by women's experience of domestic violence. The PHN outcomes studied by the papers include child health, nutrition, mortality, women's nutrition, maternal care and reproductive health, as well as condom use and thetheir risk of sexually transmitted infections and condom uses.

The Other Mother Rachel M. Harper 2022-05-03 A page-turning generational saga about a young man's search for a parent he never knew, and a moving portrait of motherhood, race, and the truths we hide in the name of family Jenry Castillo is a musical prodigy, raised by a single mother in Miami. He arrives at Brown University on a scholarship—but also to learn more about his late father, Jasper Patterson, a famous ballet dancer who died tragically when Jenry was two. On his search, he meets his estranged grandfather, Winston Patterson, a legendary professor of African American history and a fixture at the Ivy League school, who explores his world with one question: Why is Jenry so focused on Jasper, when it was Winston's daughter, Juliet, who was romantically involved with Jenry's mother? Juliet is the parent he should be looking for—his other mother. Revelation follows revelation as each member of Jenry's family steps forward to tell the story of his origin, uncovering a web of secrecy that binds this family together even as it keeps them apart. Moving seamlessly between the past and the present, *The Other Mother* is a daring, ambitious novel that celebrates the complexities of love and resilience—masterfully exploring the intersections of race, class, and sexuality; the role of biology in defining who belongs to whom; and the complicated truth of what it means to be a family.

Out of Chaos Jessica LaGrone 2022-05-10 Life is a hot mess. There's the bedlam of getting out the door in the morning. The constant breaking down of our homes and bodies and the cars we drive. And the institutions that promise to help are often no better. We are surrounded by the constant disorder of governments and disappointed by "organized" religion, the very entities that tell us they can provide us sanity and security. Instead, they leave us scratching our heads or licking our wounds. Chaos surrounds us, and at times, it seems to rule our souls, our families, and our world. But does chaos always end in failure or flaw? What if chaos was more than the check engine light of lost causes? What if chaos was the raw material out of which God creates? In the beginning God brought order from chaos, filling the chaos with a beautiful creation, and he's been doing it ever since. Where you and I may experience confusion and disorder, God sees an opportunity for something new—for a rebirth, a renewal, and a renovation. God did this in the beginning, he did it again at the cross, and with renewed vision for our disordered world today, we look to God to do it again. Inspired by the powerful picture of creation in Genesis 1:2, author Jessica LaGrone challenges the hope-destroying belief that God has abandoned us in our broken relationships, our pain, and our grief. In the midst of our out-of-control lives, God is there, and he specializes in making new things from the chaos threatens to drown us. When we experience chaos in our own lives and everything feels like it is falling apart, God is just getting started. When the Spirit of God hovers, chaos can give birth to hope.

Legalizing LGBT Families Amanda K. Baumele 2017-11 In-depth interviews examine the role of the law in the lives of LGBT parents The decision to have a child is seldom a simple one, often fraught with complexities regarding emotional readiness, finances, marital status, and compatibility with life and career goals. Rarely, though, do individuals consider the role of the law in facilitating or inhibiting their ability to have a child or to parent. For LGBT individuals, however, parenting is saturated with legality - including the initial decision of whether to have a child, how to have a child, whether one's relationship with their child will be recognized, and everyday acts of parenting. Through interviews with 137 LGBT parents, Amanda K. Baumele and D'Lane R. Compton examine the role of the law in the lives of LGBT parents and how individuals use the law when making decisions about family formation or parenting. Baumele and Compton explore the ways in which LGBT parents participate in the process of constructing legality through accepting, modifying, or rejecting legal meanings about their families. They conclude that legality is constructed through a complex interplay of legal context, social networks, individual characteristics, and familial desires. Ultimately, the stories of LGBT parents in this book reflect a rich and varied relationship between the law, the state, and the private family goals of individuals.

Lizzie Blake's Best Mistake Mazey Eddings 2022-09-06 Mazey Eddings, author of the “witty, fast-paced rom-com”* A Brush with Love, mixes passion and humor to create a luscious love story between two people stumbling through life and learning to open their hearts in Lizzie Blake’s Best Mistake. Lizzie has made endless mistakes. Kitchen fires, pyramid schemes, bangs (of the hair and human variety), you name it, she’s done it... and made a mess of it too. One mistake she’s never made is letting anyone get closer to her than a single hook-up. But after losing yet another bakery job due to her uncontrolled ADHD, she breaks her cardinal rule and has a two-night-stand that changes everything. Once burned, twice shy, Rake has given up on relationships. And feelings. And any form of intimacy for that matter. Yet something about charming, chaotic Lizzie has him lowering his guard. For two nights, that is. Then it’s back home to Australia and far away from the pesky feelings Lizzie pulls from him. But when Lizzie tells him she’s got an unexpected bun in the oven, he’ll do whatever it takes to be a part of his child’s life... except be emotionally vulnerable, obviously. He’s never going to make that mistake again. Through a series of mishaps, totally “platonic” single bed sharing, and an underground erotic baking scheme, Lizzie and Rake learn that even the biggest mistakes can have the most beautiful consequences. *USA Today bestselling author Evie Dunmore

Rhesus haemolytic disease Cyril A. Clarke 2012-12-06 Jaundice ofnewborn infants was described by several authors in the 17th century. The condition, however, was usually thought of as being similar to adult jaundice and due ro occlusion of the bile ducts by 'glutinous humours'. On the other hand, some writers reported on the fact that more than one consecutive baby was often affected, and there is a classic example of the disease in twins written by Louyse Bourgeois, the midwife of Marie de Medici, in 1609. It was not until early in the 20th century that it was realised that the common link between these familial cases was anaemia, and later still that this was of the haemolytic type. The breakthrough, in terms of an idea, came in 1938, when Darrow postulated that the baby's red cells were destroyed by an immune reaction on the part of the mother, the result of immunisation by paternal factors in the fetus. Shortly afterwards Wiener discovered an entirely new blood group system, 'Rh', and it was found that it was in compatibility within this system that was responsible for the vast majority of cases of haemolytic disease of the newborn.

The International Adoption Handbook Myra Alperson 2013-11-05 For anyone involved in, or thinking about, adopting a child from abroad, The International Adoption Handbook is an essential guide. The process of international adoption can sometimes seem complex, frustrating, and endless. This step-by-step guide, which provides the necessary hard facts and information — as well as support through the experiences of the author and others — will help smooth the way. After a general discussion of who may adopt and what restrictions may apply, the book goes into the nitty-gritty of what the process entails: choosing where to adopt and how to go about it; using an agency or facilitator; initiating the home study; assembling a dossier; working with the U.S. Immigration and Naturalization Service; knowing the topes of expenses that can be anticipated; and many other issues. In addition, the book provides up-to-date information on resources, including what is available today on the Internet, information that was previously difficult for adoptive parents to find out on their own. Equally informative are the author's interviews of a number of adoptive families whose stories are interspersed throughout the book. By sharing their experiences, they help to make the process work for others.

Redeemed by Grace Ramona Treviño 2015-02-02 At age eight, Ramona Treviño climbed to the top of a roof and begged God to let her know he was real. After receiving a sign, she made a pact with herself to follow him always. But family difficulties and growing pains made it hard for her to continue on that path. Pregnant at 16, she dropped out of high school and entered an abusive marriage, which ended in divorce.

Wanting to make a difference and to help girls in similar tough situations, she accepted a job as the manager of a Planned Parenthood facility in Sherman, Texas. Over time, however, Ramona began to grapple with whether she was doing women more harm than good, setting her on a path to seek the truth, no matter where it might lead. Realizing she could no longer refer women for abortions or provide them with false assurances of risk-free sex, Ramona took a leap of faith and left the financial security of her job. Her ultimate conversion involved a full return to the Catholic faith of her childhood and a new role as a pro-life advocate and speaker. This compelling story tells of Ramona's struggle to reconcile her identity as a daughter of God with a world that sends conflicting messages concerning the source of our dignity and happiness. It is the honest and heartfelt account of a woman who, with the help of grace, strove to overcome the wounds of her own past while becoming an agent of healing for others.

Counseling Special Populations in Schools Emily S. Fisher 2016-12-05 Counseling Special Populations in Schools provides school-based mental health professionals with practical, specific strategies for counseling special populations of students who are at risk for academic, social, emotional, and behavioral problems in school. These special populations include students who are homeless, living in foster care, involved with the juvenile justice system, LGBTQO, pregnant or parenting, gifted, in military families, at-risk for school failure and dropout, and impacted by incarcerated parents. Each chapter focuses on one group of students, highlighting critical background information and providing evidence-informed counseling approaches and strategies to promote resilience and support student development. Chapters provide specific information about how to use basic counseling skills, as well as more advanced counseling techniques such as Solution-Focused Brief Therapy, Cognitive Behavioral Therapy, and Motivational Interviewing, to address the needs and challenges of these special populations of students. This advanced-level counseling book is an excellent resource for mental health professionals and graduate students who want to be able to provide effective counseling services for all students.
