It is based partly on joint doctrine contained in JP 5-0, Joint Operation Planning, and JP 2-01.3, Joint Intelligence Preparation of the Operational Environment, but it provides more details on operational design than currently exist in these

Handbook on Data Quality Assessment Methods and Tools

products has to be selected and structured in order to become meaningful for data quality assessment. For this purpose, methods like use of key process variables, quality indicators, quality reports, and user surveys are being used. Key process variables start from the information obtained from the processes, sometimes referred to as paradata.
