encountered in physics and engineering. In particular, it occurs when solving Laplace's equation in spherical coordinates. Adrien-Marie Legendre (September 18, 1752 - January 10, 1833) began using, what are now referred to as Legendre polynomials in 1784 while studying the attraction of spheroids and ellipsoids. His work was important for ...

Most problems arising from the above formulation are computed numerically where the continuous solution is discretised in both the spatial and the temporal domain i.e., the differential equation for a variable u is discretized as $u = (u_0; u_1; \dots; u_T); u$
